Anti-Paper Leak Bill Passed

₹50 lakh for individuals involved in paper leaks and exam fraud. 7 years to 10 years' imprisonment and a fine up to ₹10 crore for organised examination-related crimes. Completion of investigations within two months. Fast-track courts to complete trials within three months of filing the chargesheet. Power to the Centre to constitute a Special Task Force for investigating major paper leak cases. States and Union Territories can establish dedicated fast-track courts for such offences. Leader of Opposition

Mallikarjun Kharge argued that increasing punishment alone would not prevent paper leaks unless examination systems and institutions were reformed. Several Opposition members, including Mukul Wasnik, Mahua Maji, and Sanjay Raut, questioned the effectiveness of harsher penalties without structural reforms and stronger accountability mechanisms. Introducing the Bill, Union Minister Jitendra Singh said the amendment reflects the government's "zero tolerance" policy towards paper leaks and aims to protect the future of students. He said the government is committed to ensuring that no one is allowed to compromise the integrity of public examinations and added that special fast-track courts and stronger legal provisions would help curb organised examination fraud.

Govt Seeks Meta Clarification

New Delhi, July 30: The Ministry of Electronics and Information Technology (MeitY) has asked senior officials of Meta to appear before the government and explain the temporary restriction placed on Prime Minister Narendra Modi's Facebook post. The meeting is expected to be held within the next seven to ten days. MeitY Secretary S. Krishnan said the government has sought both a policy-level and technical explanation to understand how the restriction occurred and what safeguards are being introduced to prevent similar incidents. Meta has already expressed regret over the incident and attributed it to a technical glitch, but the Centre said the preliminary explanation was inadequate and sought a detailed clarification. The restricted Facebook post, published on July 23, highlighted the government's commitment to taking strict action against NEET paper leaks and reassured students about examination reforms. According to Krishnan, Meta has informed the government that it introduced a new protocol from July 28 to prevent such errors. The updated system includes additional oversight for posts published by the Prime Minister and other high-profile accounts to avoid accidental restrictions in the future. The government said it intends to convey its concerns directly to Meta and ensure stronger safeguards are put in place to prevent recurrence of such incidents.

FSSAI Bans Two Syrups

New Delhi, July 30: The Food Safety and Standards Authority of India (FSSAI) has banned the sale of two health supplement products over misleading claims and labelling violations, while taking strict action against several food business operators for violating food safety norms. The regulator issued a prohibition order against Vavave Health Care for its 'FOLINEURO Syrup – Folinic Acid Syrup', stating that the product's name and brain image on the label falsely suggested benefits for brain and neurological health. FSSAI also found that the product was classified as a "Nutritional Food Supplement", a category not recognised under the Food Safety and Standards (Health Supplements and Nutraceuticals) Regulations, 2016. The authority has prohibited its manufacture, storage, distribution, marketing and sale with immediate effect. In a separate action, FSSAI banned the sale of 'Neuherbs TRUE VITAMIN', marketed by Global Healthfit Retail India Pvt. Ltd., stating that the trade name "TRUE VITAMIN" was misleading and violated the Food Safety and Standards (Advertising and Claims) Regulations, 2018, and the Labelling and Display Regulations, 2020. The regulator directed the company to immediately stop the sale of the product, remove all misleading claims from labels and advertisements, and submit an Action Taken Report within 30 days, warning that failure to comply would invite further legal action. FSSAI said the enforcement drive aims to protect consumers from misleading marketing, non-compliant labelling, food safety violations and poor hygiene practices.

Agriculture Under
Climate Stress

Agriculture has always depended on nature, but climate change is making that relationship increasingly unpredictable. Rising temperatures, erratic rainfall, prolonged droughts, unseasonal storms, and frequent floods are transforming farming into one of the most vulnerable sectors of the economy. For a country like India, where nearly half the population depends directly or indirectly on agriculture for its livelihood, climate stress is no longer an environmental concern-it is an economic and food security challenge. The impact of climate change is visible across the country. Delayed monsoons disrupt sowing schedules, while excessive rainfall within a short period damages standing crops. Heatwaves reduce crop yields, lower soil moisture, and increase water demand. Farmers are also battling new pests and diseases that thrive under changing climatic conditions. The result is lower productivity, rising cultivation costs, and growing uncertainty in farm incomes. Small and marginal farmers, who constitute the majority of India's agricultural community, are the worst affected. With limited access to irrigation, crop insurance, and modern technology, they often bear the full burden of climate-related losses. Repeated crop failures push many into debt, forcing distress migration or abandonment of farming altogether. Climate change, therefore, is not only affecting crops but also rural livelihoods and social stability. Water scarcity has emerged as another critical concern. Agriculture consumes nearly 80 percent of India's freshwater resources, yet groundwater levels continue to decline in many regions. Traditional water-intensive crops are becoming increasingly unsustainable in drought-prone areas. Promoting micro-irrigation, rainwater harvesting, watershed development, and efficient water management is essential to ensure long-term agricultural sustainability.

Technology can play a transformative role in building climate-resilient agriculture. Artificial Intelligence, satellite imagery, weather forecasting, and precision farming can help farmers make informed decisions about sowing, irrigation, and pest management. Climate-resilient crop varieties that can withstand drought, floods, and high temperatures should be developed and distributed on a larger scale. Expanding digital advisory services and strengthening agricultural extension networks will ensure that scientific knowledge reaches even the smallest farmers. Government policies must also evolve. Timely crop insurance settlements, better market access, affordable credit, investment in rural infrastructure, and incentives for sustainable farming practices are critical. Encouraging crop diversification, organic farming, agroforestry, and renewable energy in agriculture can reduce both environmental impact and production risks. Climate change is not a distant threat-it is already reshaping India's agricultural landscape. Ensuring food security in the coming decades will require a shift from conventional farming to climate-smart agriculture.

PIB Hyderabad Holds 'Varta' on 12 Years of Public Welfare

Hyderabad, July 30: The Press Information Bureau (PIB), Hyderabad, organised a 'Varta' programme on the theme "12 Years of Vishwas, Vikas, Jan-Kalyan" at CGO Towers, Kavadiguda, bringing together representatives of various Central Government departments and organisations to strengthen public communication and inter-departmental coordination. Officials from participating departments highlighted the major achievements, welfare programmes and flagship initiatives implemented over the past 12 years. They also shared details of ongoing activities, upcoming campaigns and future outreach plans while discussing ways to improve coordination among departments. The meeting focused on enhancing the dissemination of information on Central Government schemes

by effectively utilising the combined strengths of the Press Information Bureau (PIB), Central Bureau of Communication (CBC), Doordarshan and All India Radio (AIR). Participants stressed the importance of coordinated media engagement, regional language translations, social media outreach, press tours and grassroots awareness campaigns to ensure wider public reach. They also agreed to establish a common communication platform for the timely sharing of information, press releases and campaign updates. Addressing the meeting, Shruti Patil, Additional Director General, PIB, said the platform provides an opportunity for communication professionals from various Central Government departments to work together in strengthening public outreach. She noted that effective com-

munication is essential to ensure Government welfare programmes reach every citizen and expressed confidence that collaborative efforts would improve public awareness across Telangana. The meeting concluded with a consensus to

hold regular interactions, strengthen coordination among departments and undertake integrated publicity initiatives to enhance the visibility of Govt programmes while avoiding duplication of communication efforts.

PLI Food Scheme Creates 3.35 Lakh Jobs

New Delhi, July 30: The Centre's Production Linked Incentive (PLI) Scheme for the Food Processing Industry has attracted investments worth ₹9,207 crore and generated 3.35 lakh direct and indirect jobs, surpassing

its employment target of 2.5 lakh, the government informed Parliament on Thursday. According to information tabled in the Lok Sabha, sales of PLI-supported products increased from ₹58,758 crore in 2019-20

to ₹1,08,854 crore in 2025-26. Currently, 163 applications from 127 companies, including 69 MSMEs, have been approved under the scheme. These projects are spread across 212 locations in 22 states, with incentives worth ₹3,271.44 crore disbursed till June 2026. The government said investments under the scheme have created an additional 34 lakh metric tonnes per annum of food processing capacity while boosting production, exports, value addition and employment. The PLI Scheme for Food Processing Industries, implemented by the Ministry of Food Processing Industries, has a total outlay of ₹10,900 crore for the period 2021-22 to 2026-27. It offers performance-linked incentives to promote domestic food processing, develop global food manufacturing champions, strengthen Indian food brands

overseas and create jobs. To support exports, the scheme provides financial assistance of 50 per cent of eligible branding and marketing expenditure abroad, subject to a ceiling of 3 per cent of annual food product sales or ₹50 crore per year, whichever is lower. The government also highlighted that the scheme encourages adoption of modern processing, packaging and manufacturing technologies and includes a dedicated category for MSMEs producing innovative and organic food products. In addition, the Centre is implementing the Prime Minister's Formalisation of Micro Food Processing Enterprises (PMFME) Scheme, which provides financial assistance, technology support, skill development and market linkages to strengthen micro food processing units across the country.

Rahane Retires Internationally

Mumbai, July 30: Veteran Indian batter Ajinkya Rahane on Thursday announced his retirement from international cricket, bringing down the curtain on a distinguished career spanning more than a decade. The 38-year-old represented India in 85 Tests, 90 One-Day Internationals and 20 T20 Internationals after making his debut in 2013. Although he last played for India during the 2023 Test series against the West Indies, Rahane had continued to hope for an international comeback. Announcing his decision through a video message on social media, Rahane said the time had come to move forward. "Everything has a beginning and an end. I have always believed in timing, and today I feel the timing is right to retire from international cricket in all formats," he said. Rahane scored 5,077 Test runs at an average of 38.46, including 12 centuries and 26 half-centuries. In ODIs, he amassed 2,962 runs with three centuries and 24 fifties, while he scored 375 runs in T20Is. One of the defining moments of his career came in 2021, when he captained an injury-hit Indian side to a historic 2-1 Test series victory in Australia, following Virat Kohli's departure after the opening Test. Reflecting on his journey, Rahane said he always placed the country and the team above personal milestones. "I played this game with complete honesty. There were wins, losses and failures, but the greatest satisfaction has been representing India and creating unforgettable memories," he said. Rahane also confirmed that he would remain connected to the sport by mentoring the next generation of cricketers. Despite being out of the national team in recent years, Rahane remained active in domestic cricket and led Mumbai to their 42nd Ranji Trophy title during the 2023-24 season. His retirement marks the end of an international career remembered for resilience, composure and leadership in some of India's most memorable Test victories.

Former MLA Sudarshan Reddy Dies

Hyderabad, July 30: Former Narsampet MLA and senior Bharat Rashtra Samithi (BRS) leader Peddi Sudarshan Reddy passed away in the early hours of Friday while undergoing treatment at a private hospital in Hyderabad. He was 52. According to hospital sources, Sudarshan Reddy breathed his last at 12.51 a.m. at Yashoda Hospital, where he had been undergoing treatment after suffering a massive pulmonary embolism. He was also battling a severe lung infection. The former MLA was initially admitted after suffering a cardiac arrest in Hanamkonda on July 26. Though doctors managed to stabilise his condition following emergency treatment, his health deteriorated later.

FACTS ABOUT ETHANOL BLENDED PETROL:
SEPARATING FACTS FROM MISCONCEPTIONS

INDIA'S EBP PROGRAMME: ADDRESSING RECENT MISLEADING CLAIMS

GRADUAL PROGRESSION OF ETHANOL BLENDING

MISCONCEPTION:

VEHICLES BEFORE 2023 CANNOT RUN ON E20 PETROL.

FACT:

WIDESPREAD USE: E15+ in use for over 3.5 years, E19-E20 for over 2.5 years. No widespread failures reported.

GLOBAL EXPERIENCE:

Global use for decades; EBP programme in India since 2001, E5 since 2006. Calibrated increases after infrastructure and regulatory readiness.

MISCONCEPTION:

NEARLY 30 CRORE VEHICLES WILL BECOME UNUSABLE.

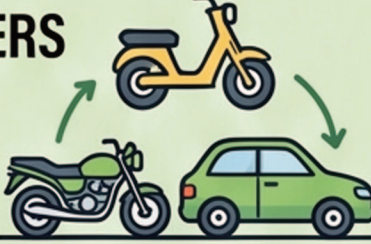

FACT:

OVER 20 CRORE TWO-WHEELERS AND 3 CRORE PETROL CARS

have operated on these fuels without systemic issues.

If true, millions of failures would occur; they haven't.

MISCONCEPTION:

OLDER VEHICLES ARE AT RISK.

FACT:

SERVICE DATA FROM MAJOR MANUFACTURERS (FY 2025-26):

- One OEM serviced 2.84 crore vehicles, including 1.5 crore not originally certified E20-compatible, and found **NO E20-LINKED CORROSION OR ABNORMAL WEAR.**
- Another OEM tracked 1.4 crore vehicles with same result.

MISCONCEPTION:

MILEAGE WILL COLLAPSE.

FACT:

Factors affect from: Driving style, traffic, maintenance, tyre pressure, AC usage.

MILEAGE IMPACT FOR OLDER E10-DESIGNED VEHICLES IS LIMITED TO 3-5%.

E20 ADVANTAGES:

Higher octane, cleaner combustion, smoother performance, better acceleration.

STRICT QUALITY ASSURANCE

OVER 30,000 RETAIL OUTLET INSPECTIONS for quality verification.

CONFORMS TO BIS SPECIFICATIONS.

ZERO TOLERANCE TOWARDS FUEL ADULTERATION.

SCIENTIFIC FOUNDATION & MANUFACTURER SUPPORT

INTRODUCED AFTER EXTENSIVE CONSULTATION and rigorous scientific validation. Testing for drivability, durable, emissions, fuel systems, and performance before rollout.

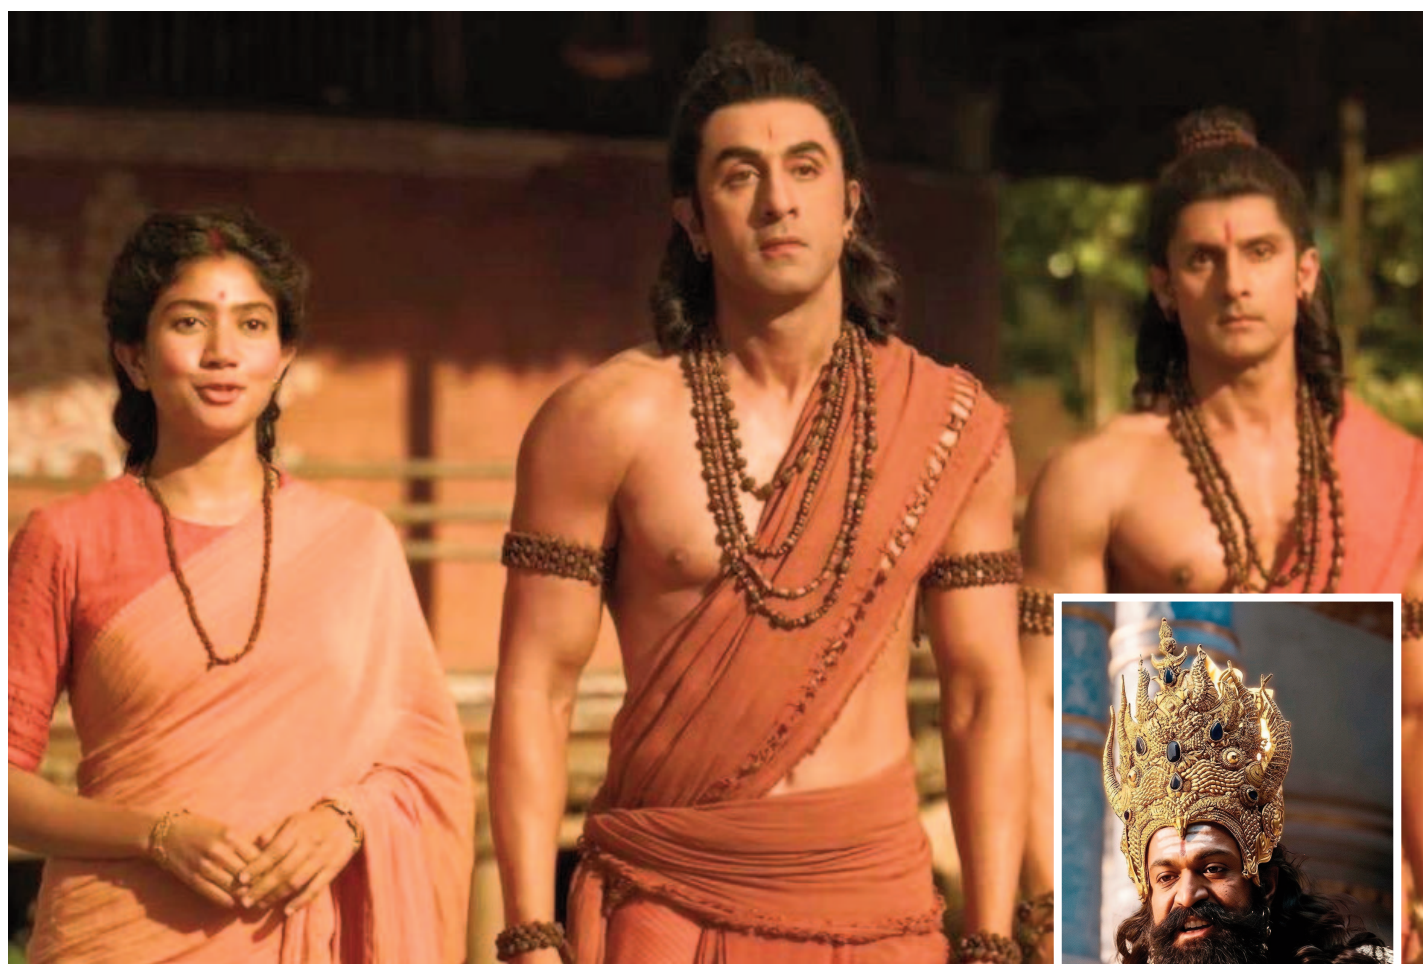

MANUFACTURERS CONTINUE TO HONOUR VEHICLE WARRANTIES for compliant E20 fuel, reflecting confidence.

Yash Dominates 'Ramayana' Trailer

The much-awaited trailer of 'Ramayana' has been released, with actor Yash emerging as the biggest highlight for his powerful portrayal of Raavan. While Ranbir Kapoor appears as Lord Ram and Sai Pallavi essays the role of Sita, it is Yash's commanding screen presence, intense expressions and imposing body language that have become the major talking point among audiences. The trailer has generated mixed reactions on social media. Many viewers praised its grand visuals and visual effects, while others felt that the heavy emphasis on VFX overshadowed the emotional depth of the characters. Despite the divided response, Yash's performance has received widespread appreciation, with fans describing his portrayal of Raavan as impactful and larger than life. Industry observers believe the positive buzz around Yash's role could also benefit his upcoming film 'Toxic', particularly in the Hindi market where the project has been awaiting stronger momentum. Directed by Nitesh Tiwari, Ramayana stars Ranbir Kapoor, Sai Pallavi and Yash in lead roles. The first installment of the epic is scheduled for release during Diwali 2026, with the second part set to arrive in Diwali 2027.

Big B Starts KBC 18 Shoot

Bollywood megastar Amitabh Bachchan has completed the pre-production work for the 18th season of 'Kaun Banega Crorepati' (KBC) and announced that shooting for the popular quiz show will begin on August 1. Sharing photographs from the sets on his blog, the veteran actor said the preparation phase had concluded and the actual test would now begin. Reacting to the flood of Guru Purnima greetings he received from fans, Amitabh expressed gratitude and apologised for being unable to respond to every message. "There were so many messages that I couldn't decide whether to work or reply to them. I sincerely seek your forgiveness," he wrote. Speaking about the new season, Amitabh referred to the show's promotional tagline, saying, "This time, you'll have to think a little harder – Sochna Padega." The actor has hosted Kaun Banega Crorepati for almost its entire run, except the third season, which was hosted by Shah Rukh Khan. Based on the internationally acclaimed format 'Who Wants to Be a Millionaire?', the show features contestants answering multiple-choice questions with the help of lifelines to win prize money. The first episode of KBC Season 18 is scheduled to premiere on August 10 on Sony Entertainment Television.

Nitish's Advice To Ranbir

Mumbai, July 30: Veteran actor Nitish Bharadwaj, best known for portraying Lord Krishna in the television epic Mahabharat, has praised the trailer of 'Ramayana' while urging actor Ranbir Kapoor to stay away from films like 'Animal' in the future. Sharing the film's poster on social media, Nitish Bharadwaj described Ramayana as a world-class cinematic project and showered praise on producer Namit Malhotra, director Nitesh Tiwari, actor Yash, and the technical team. He also applauded international composer Hans Zimmer for collaborating with Indian cinema and expressed confidence that the film could earn global recognition. Addressing Ranbir Kapoor directly, Nitish wrote that the actor now carries a greater social responsibility after portraying Lord Ram. He urged Ranbir to avoid films similar to Animal, saying, "Please do not pollute your vaani anymore. India has enough stories to showcase your acting talent." Nitish also expressed hope that audiences would accept Sai Pallavi as Sita and wished that traditional elements such as Tulsidas' chaupais, accompanied by mridangam and manjira, would feature in the film to preserve the spiritual essence of the epic. The veteran actor added that he intends to watch Ramayana at least five times as a tribute to the hard work behind the ambitious project.
